Improvement of Human Functioning, Inc.  
428 N. Oliver Street  
Wichita, Kansas 67208

Dear Bill,

In reference to our phone conversation of April 23, find herein a copy of an article on Marsha Adams. Her knowledge extends far beyond the confines of the article. My specific interests in her research involve the advancement of human potentials and limitation to such advancement within the boundaries of our global ELF environment. For several years now I have wanted to have you two meet.

I hope that as scientists your two areas of expertise can grow from this meeting. I will surely enjoy being able to be there with you. See you on June 12.

As always,  
SGFOIA3

Project Training Officer
